

NDIA Human Logistics
Supply Chain Management
Sub-committee

24 August 2007

1. Title and Scope

- Supply Chain Management
 - Define overall generic “job description”
 - Define competency for our profile
 - Identify core skills required to execute the defined capability across DOD Military, Civilian and Industry domains with uniqueness noted where applicable
 - Define each core skill as a set of sub-skills

2. Working members

- LTC Linda Hurry - TRANSCOM J5/J4
- Michael Scott - DLA Office of Enterprise Transformation
- Leanne Viera – IBM Public Sector Supply Chain Solutions
- Harold Goldzung – XIO Strategies
- Marc Cramer – Institute for Defense & Business
- Irvin Varkonyi – APICS / George Mason University (Sub-committee leader)

3. Additional desired members with organizations

- A second academic representative
- ALMC (or equivalent service logistics training organization)

4. Issues identified to date

- Defining SCM – Multiple options must be considered such as
 - Multiple training backgrounds + service demands + outsourced strategies = infinite variety
- Consistency with the “Future Logistician”
- The changing nature of logistics models and the impact on the DoD
- Impact of outsourcing on DoD’s supply chain
- Capitalize on related DOD initiatives and effort
