International Cooperation Committee *Mission Statement (Draft)*

- Provide a forum that fosters interchange with international customers, industry and academia
- Work with DoD customers to synchronize/harmonize international requirements with those of the U.S. with an emphasis on interoperability
- Develop a strategy and implementation plans with Departments of Defense and State that will foster and facilitate programs with U.S. allies

International Cooperation Committee

Initial Task List

- Identify international companies that are players in the ground robotics arena (platforms and key mission payloads), including academia.
- Identify international customers/organizations and include their participation in future meeting agendas.
- Identify issues and challenges for U.S. ground robotics companies selling abroad.
- Identify generic topics/subjects to initiate dialogue with Allies and international companies.

For Next Meeting

- ✓ Add additional subcommittee members
- ✓ Finalize subcommittee charter
- ✓ Results of task assignments
- ✓ Schedule international speaker for next Division meeting
