---

- **DoD ATS Management Board met during AUTOTESTCON**
  - 2009 DoD ATS Master Plan and 2009 DoD ATS Selection Process Guide have been published
  - ATS Framework demonstrations during AUTOTESTCON very successful
    - More demos in work
    - I meet with the team next week for future strategy discussions
  - TPS IPT close to finalizing update to MIL-PRF-32070
    - Removes references to ATLAS
    - Tightens ambiguity groups (sets the bar higher)
    - Changes the reliability requirement to 10,000 hours MTBF for passive IDs
  - TPS IPT's next issues to be addressed:
    - Establishing standard roadmaps for TPS acquisition and life cycle sustainment
    - Next generation programming language
    - Common run-time system
