

NDIA Automatic Testing Committee

DoD ATS Liaison

Bill Ross
DoD ATS Executive Directorate
15 June 2010

DoD Automatic Test Systems Executive Directorate (ATS ED)

- DoD ATS Management Board (AMB) will meet next during AUTOTESTCON
- Will lead the AUTOTESTCON 2010 Plenary Session

Current Initiatives

- Documenting the software architecture designs of the ATE used by the Services today (from the instrument level to the RunTime System)
 - May lead to a common DoD ATE software “architecture”
- Defining a plan to document a Joint Services common test programming language for TPS development and sustainment
 - Outlining the design artifacts outputs for TPS requirements analysis, development, and sustainment
 - Determine the best way to document the language
- Joint Services “TPS Improvement” Industry Day or Workshop – Is there industry interest?
