

CBDAIF Systems Integration Sector

January 14, 2010

CBDAIF Systems Integrator

- Good Things in terms of What We See
 - Increased Emphasis on Systems Engineering
 - Should result in more robust subsystems
- Jury is Still Out
 - Trailbosses ability to help cross-cut the systems integration issues
- Bad Things We See
 - Acquisition Reform is causing significant perturbation in the procurement process
 - Perceived as causing funding vulnerability
 - Emphasis on expenditure rate doesn't recognize current economic climate
 - Long lead = Longer Lead
 - Requirements Process still hasn't caught up with System of System Thinking; Still not in tune with Fixed Price Procurement
