Speaker Biography

Ms. Dawn Meyerricks

*Deputy Director for National Intelligence Acquisition & Technology
Office of the Director National Intelligence*

Dawn Meyerriecks currently serves as the Deputy Director of National Intelligence for Acquisition and Technology. In this role, she explores and delivers complex technologies underpinning national missions. Prior to this assignment, Dawn has held a variety of consulting, advisory and delivery positions in government and industry. She ran Product Technology at AOL, relaunching aol.com and new Instant Messenger and client platforms. She served as the Chief Technology Officer for the Defense Information Systems Agency, delivering Global Command and Control to Combatant Commanders. Meyerriecks also worked at the Jet Propulsion Laboratory, delivering military messaging capabilities to tactical through strategic commands. She has won numerous awards, including InfoWorld 2002 CTO of the year. She earned her Bachelor of Science Degree in Electrical Engineering from Carnegie Mellon University and a Master of Science in Computer Science from Loyola Marymount University.
