

COVID-19

When You've Been Fully Vaccinated

How to Protect Yourself and Others

Updated June 17, 2021

Choosing Safer Activities

- If you are fully vaccinated, you can resume activities that you did prior to the pandemic.
- Fully vaccinated people can resume activities without wearing a mask or physically distancing, except where required by federal, state, local, tribal, or territorial laws, rules, and regulations, including local business and workplace guidance.
- If you haven't been vaccinated yet, [find a vaccine](#).

Safer Activities

COVID-19 vaccines are effective at protecting you from getting sick. Based on [what we know](#) about COVID-19 vaccines, people who have been fully vaccinated can do things that they had stopped doing because of the pandemic.

These recommendations can help you make decisions about daily activities after you are fully vaccinated. They are *not* intended for [healthcare settings](#).

Have You Been Fully Vaccinated?

In general, people are considered fully vaccinated: ±

- 2 weeks after their second dose in a 2-dose series, such as the Pfizer or Moderna vaccines, or
- 2 weeks after a single-dose vaccine, such as Johnson & Johnson's Janssen vaccine

If you don't meet these requirements, regardless of your age, you are NOT fully vaccinated. Keep taking all [precautions](#) until you are fully vaccinated.

If you have a condition or are taking medications that weaken your immune system, you may NOT be fully protected even if you are fully vaccinated. Talk to your healthcare provider. Even after vaccination, you may need to continue taking all [precautions](#).

What You Can Do
