

Chemical Biological Defense Acquisition Initiatives Forum (CBDAIF)

Demil and Non-Stockpile
Report
27 September 2018

Presenter
Dr. Venkat Rao

Companies in Sector

- AECOM
- Battelle
- Bechtel
- Black and Veatch
- CH2M (Jacobs Engineering Group)
- Eisenmann
- PAE
- Parsons
- Teledyne Brown Engineering

Health of Sector

- Mature sector. Good at execution if called up
- Beyond PCAPP (Operations) and BGCAPP (systemization), the sector capability remain latent
- Prepared for international stockpile contingencies and Non-stockpile in CWE
- Risk of loss of talent/expertise is real and happening
- Leverageable expertise for new future missions and deployable technology platforms

Major Sector Concerns

- Vision for Industry:
 - Beyond Pueblo (PCAPP) and Blue Grass (BGCAPP), the Sector is unclear on the scope of services needed.
 - Future global contingency operations is a key driver for this sector.
- Investment:
 - RDAP and OTA mechanisms to investment on R&D and ATD type projects
 - Need a strategic dialogue with JPEO to remain viable.

Sector Expectations for CBDAIF Meeting Outcomes for Next Year

- JPM Guardian expands scope of CWE to Infrastructure, Disable and Dispose.
- Focus on emerging topics
 - Contingency options for CW demilitarization
 - Chemical security
 - Critical Installations
 - Technologies addressing existing and emerging NTA
- Opportunities to contribute to for future contingency planning
- Support Acquisition initiatives in chemical security, NTA and Homeland Security
- Support, identify mission-critical technologies associated for contingent deployment

Other Sector Issues

- Future global contingency operations will be lead by the US, which faces the risk in the Sector of losing the workforce.
- Completion of Pueblo and Blue Grass will lead to dissipation of the Sector and the workforce.
- JPM Guardian minimal interactions with the Sector as it integrates scope of CWE.
- Other breakout opportunities are needed to keep this sector viable.
