- Orbital ATK Inc.

Observations – Follow up

- International work continues to be an opportunity – opportunities have continued
- GFM Quality Issues Persist – opportunities for collaboration to drive out systemic issues.
- TDP remains an open issue – Industry to address individual issues at an IPT level.

Emerging Quality Concerns – Follow up

- CPOA limits tighten
- Stricter Interpretation of existing standards
- Scope of CCCP
 - Unintended Consequences include increased cost, production delays and delay of sale for product that meets specifications.

- Sector data was limited and inconclusive. Industry to address at an IPT level.

HE availability

- Demand is increasing, resulting in extended lead times.
- In some cases, lead times are longer than the entire contract period of performance.
- The challenge will persist for some time.
- Requires creativity and collaboration to overcome / managing to the critical path.
