Corporation

Southwest
Research Institute

Spectra
Technologies, LLC

Stresau
Laboratory, Inc.

Issues, Concerns, & Recommendations

- FFP TDP scrub for obsolescence
- Pre-screening for defects prior to final inspection station, not allowed. Pre-screen versus new manufacturing process that yields 1 in a million defects. Cost and schedule impacts
- Interface control tolerance issues with TDPs
- No full government document review and response for AIE/AAIE, QAPPs, etc.; creating schedule delays
