**Questionnaire to Loitering Munition OEMs**

Reference: Loitering Munitions Industry Days 08-09 June 22

The following questions are a guideline for your 45-minute presentation (Q&A included). We would appreciate if your presentation could reflect the same structure as outlined underneath and that you - as much as possible provide dedicated answers to these questions in your presentation.

You are invited to send over this presentation NLT 01 Jun 22 to [MRSYS-I-a-m@mil.be](mailto:MRSYS-I-a-m@mil.be). These presentations will be treated as company confidential.

1. Company Profile
  - a. Is your system already operationally deployed / sold (to who)?
  - b. Is your system 'off the shelf' or can it be adapted to customer specifications? If not, are you willing to do that?
  - c. Export or contract limitations?
2. System description and configuration
  - a. Operational Concept
  - b. Technical data
3. Effects / Warhead
  - a. What is the target spectrum?
  - b. Warhead type, scalability
  - c. Safety and arming procedures
4. Seeker / Sensors
  - a. Detection, ID ranges for each target in your spectrum
5. Ground Control Station
  - a. Type
  - b. How many LM can be controlled simultaneously by ONE operator?
  - c. Is relay possible between GCS/ Airborne relay?
  - d. Interface to C<sup>2</sup>
  - e. Mission data collection

6. Limitations
  - a. What are the limitations of the system? (Technical, operational, meteo)
7. Simulation / Training
  - a. Simulator, Indoor, Outdoor Trainer?
8. Lifecycle Support
  - a. What kind of aftersale support is offered?
