

STRENGTH THROUGH INDUSTRY & TECHNOLOGY

**Production EVM
Working Group Outbrief
August 2011 PMSC**

Working Group Progress

Status at May 11 PMSC

- Sub group documentation efforts mostly complete
- Complete Summary/main body of white paper (about 33% complete)
- Circulate white paper to all WG participants and then to PMSC (updated version circulated 3 times)
- Target final product in mid-2011 (July??) to be made available to PMSC membership for final review and comment

Status at Aug 11 PMSC

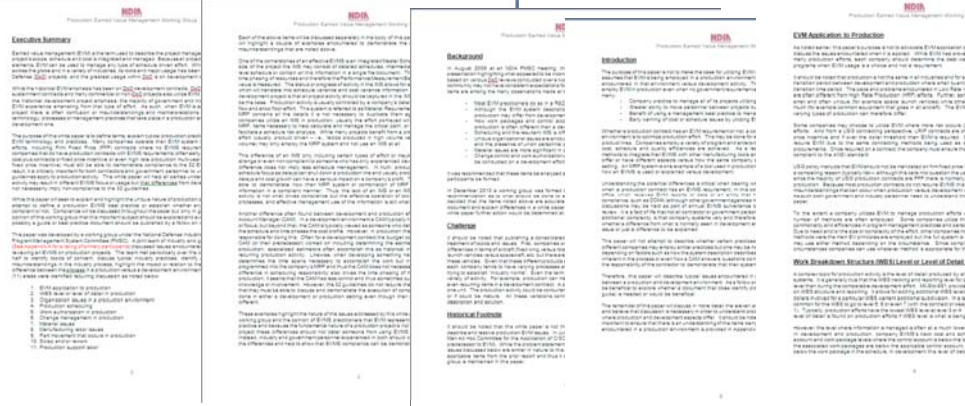

- Sub group documentation complete
- Final Draft 100% complete
- White paper has been circulated to all WG participants several times and has been provided to PMSC board for their review and comments
- Once board has approved, WP will be distributed to PMSC membership

White Paper Summary

Earned Value Management
in a Production Environment

TBD XX, 2011

● White paper components

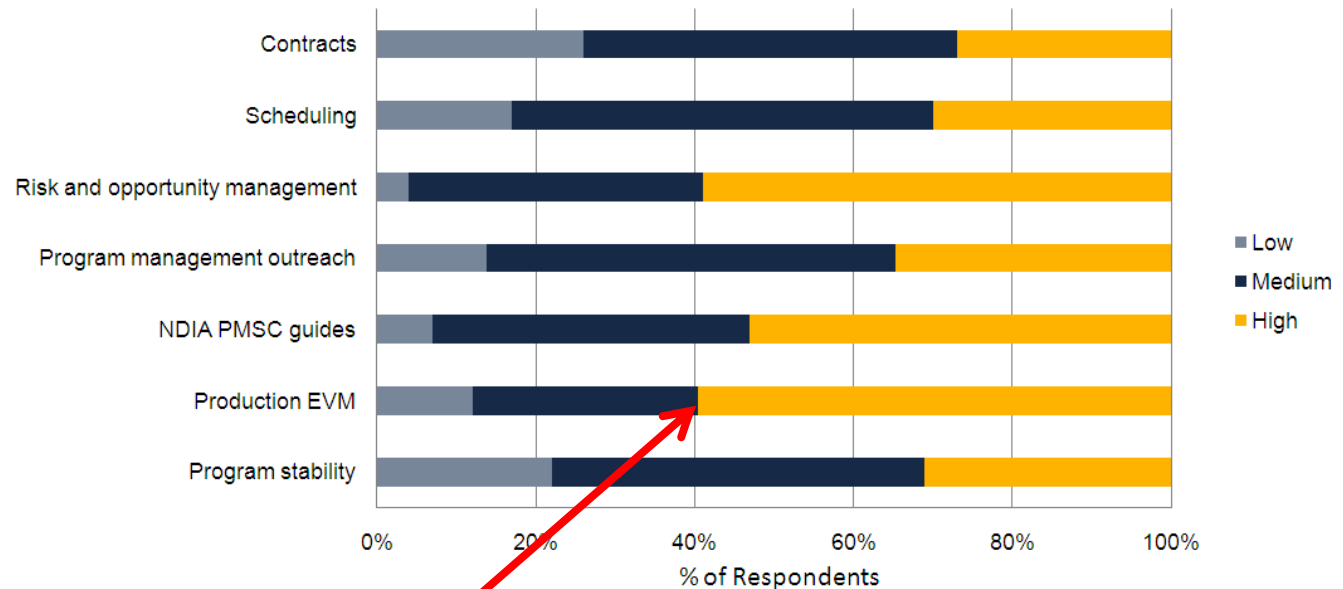

- Executive summary, background and introduction sections
- 11 detailed topics discussed (EVM application to production, WBS level and level of detail, organization, scheduling, work authorization, change management, material, manufacturing labor, part movement, scrap/rework, production support)
- Listing of working group participants
- Glossary of production terms
- 23 pages

Next Steps

- After PMSC board approves for release, white paper will be distributed to full committee for comments
- Comment period timeframe is TBD
- White paper will then be updated and ready to post on NDIA PMSC website

Interest in Production Issues is High (Survey)

PMSC Working Groups have been established to focus on issues related to specific topics of interest to the general membership. Please indicate the benefit (value) of these working groups to your needs:

Interest in Prod EVM rated as high (almost 60%)

Discussions initiated for follow post white paper activity
