- Regional Meetings
- Expand Partnerships
  - DAU
  - University Outreach
  - LinkedIn
  - Other Professional Organizations

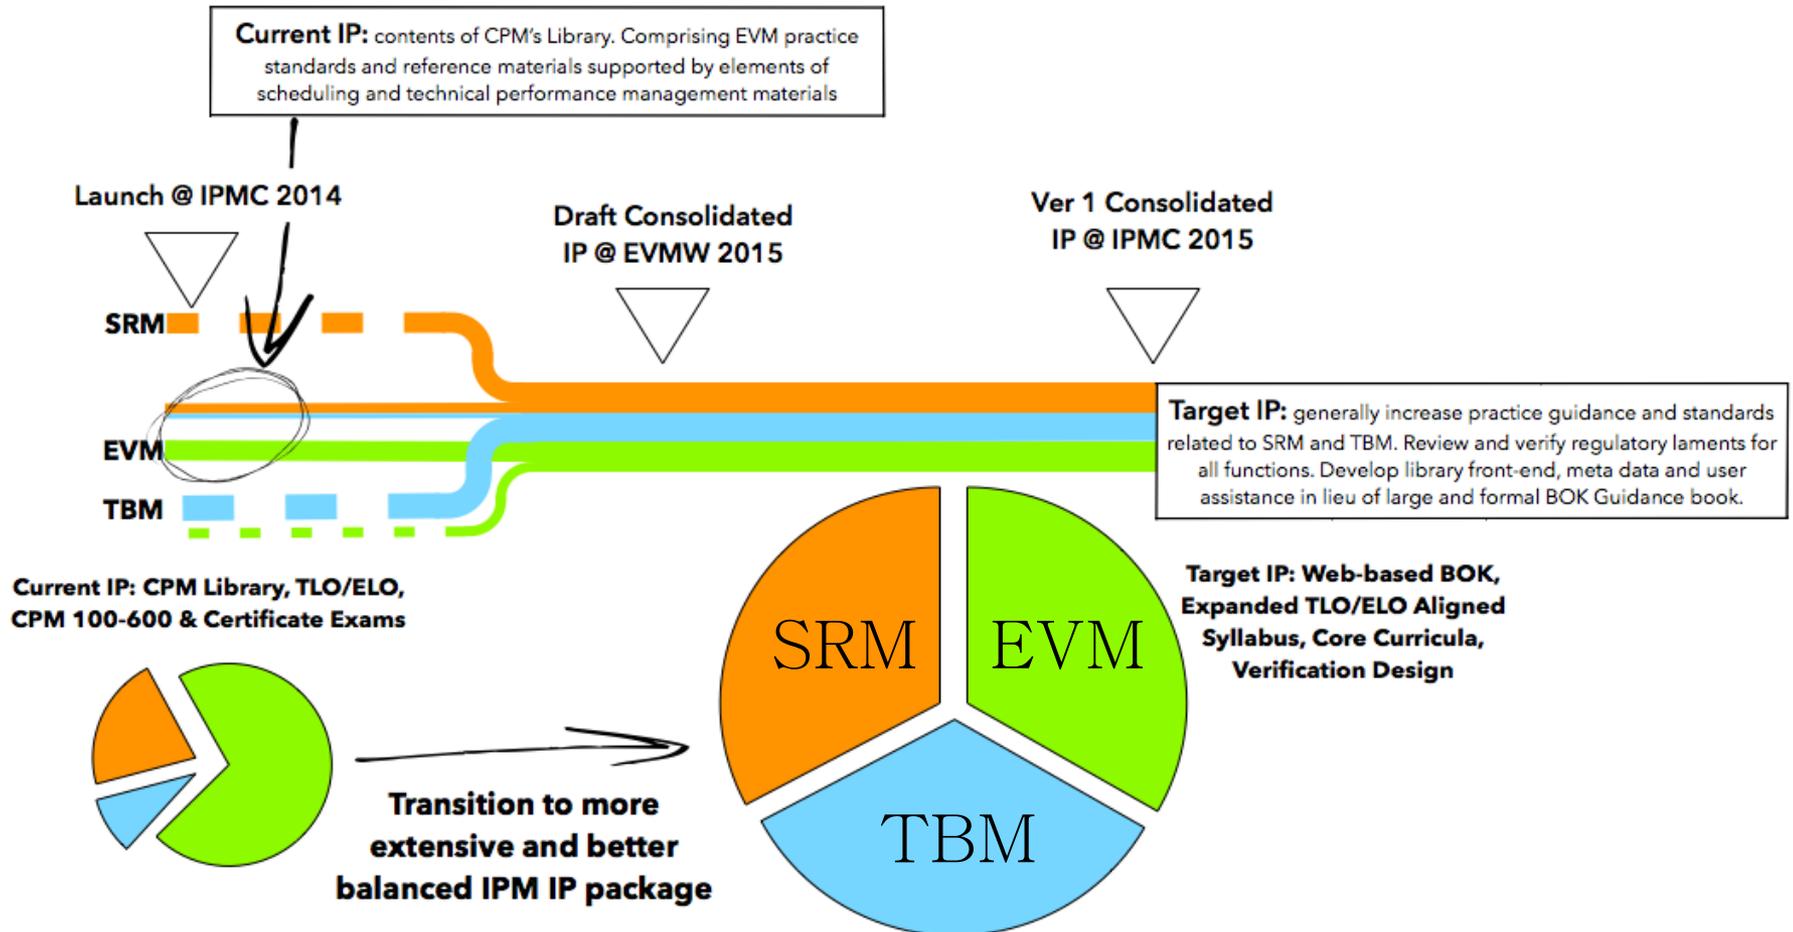

# Emphasis – Integrated Program Performance Management

- EVM = earned value management – CPM’s core IP and highest priority for certification program implementation. EVM comprises formal approaches to structuring and quantifying planned and actual execution of quality-constrained scope in an integrated cost and schedule performance management environment
- TBM = technical / benefits management – aligned to Systems Engineering, Technical Performance Measurement and Benefits Realization. BTM structures, plans and measures desired vs. actual mission and supporting technical outcomes in an integrated performance management environment to quantify and deliver value
- SRM – schedule / resource management – applies various schedule and capacity management techniques adapted to integrate traditional structured governance methods with dynamic operational methods and similar dynamic process management systems (e.g., Agile, MRP)

Our applicants may come from any of these backgrounds with an aspiration to broaden their career knowledge and skills through CPM

# IPM Intellectual Property Plan

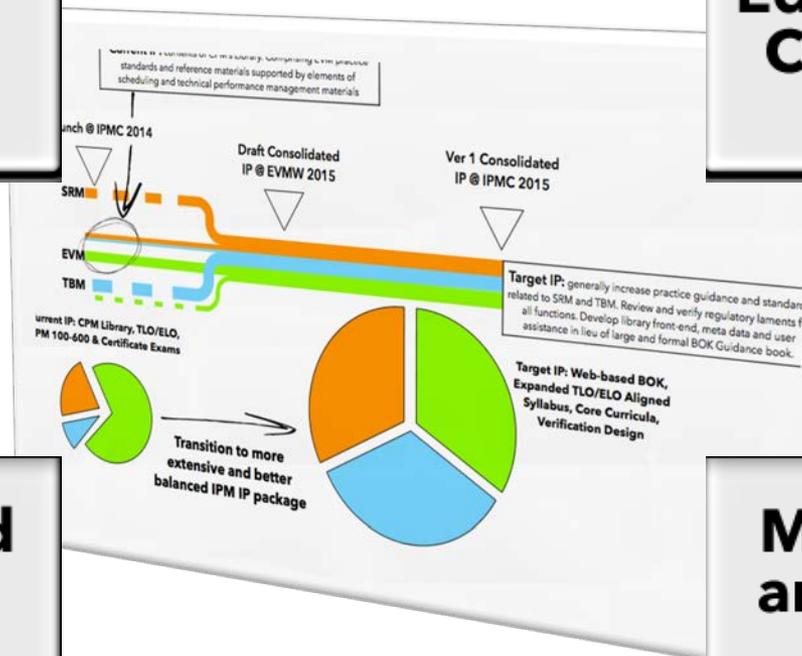

# Building a Balanced IPPM Approach and Knowledge-driven Future Plans

**Workshops and Events Programs**

**Education and Certification Programs**

**Research and Standards Programs**

**Membership and Chapter Programs**

CPM is adapting to the evolving needs of our stakeholders. We value your insight and inputs.
