

EVIPWG Exploratory Meeting

NDIA

Overview/Mission:

To assess the appetite in Industry and Government for updating/refreshing the EVM practices on production contracts with an EVMS requirement.

Leadership:

Scott LaFrance
scott.lafrance@baesystems.com

Objectives:

- Evaluate the level of interest with Industry and Government
- Establish a working group to study current practices in use throughout industry
- Conduct a survey of industry of current practices as they related to production programs
- Conduct a survey of government to assess current needs as they relate to EVMS/Integrated Program Controls

EV in Production Working Group (EViPWG) Exploratory Committee

Purpose

To assess the current practices and needs within government and industry and provide a recommended scope, purpose, composition, and Plan of Actions & Milestones for a permanent EV in Production Working Group to be chartered by the NDIA-IPMD Board of Directors

Plan of Action and Milestones

- Charter an EV in Production Working Group Exploratory Committee
- Identify a EViPWG-EC co-chair
- Develop a “How we work” survey to assess current industry practices
- Develop a “What we need” survey to assess current USG needs (buying commands)
- Outbrief at Fall IMPD meeting
- Charter an EV in Production Working Group
