WEBINAR SERIES

Improving Supply Chain Resiliency Through Digital Transformation

Wednesday, May 5, 2021

1:00 PM - 2:30 PM EDT

Digital transformation is essential in order to survive and thrive in today's hyper-competitive markets. Digital capability integration will provide a disruptive differentiation for those manufacturers who adopt and leverage digital technologies.

Join us for a discussion and presentation on how the manufacturing supply chain can improve resiliency through digital transformation.

This free webinar is open to anyone interested in accelerating improvement of their operation through digital transformation
