

# NDIA SED Executive Steering Committee Inputs for 2022 Planning

L3Harris Technologies (Alana Murphy, Sr. Director, Corporate Engineering Operations)

Suggestions for defense industry inputs to NDIA SE Division 2022 planning:

- Digital engineering – alignment and standardization in A&D
  - Mature a unified, consistent industry/government approach – lifecycles, products model-based reviews, reference models
  - Deploy and improve DE measurement framework (PSM, NDIA, AIA, INCOSE, ...) – gov't/industry/academia consensus
- DoD Systems Engineering Modernization
  - Strong industry support and collaboration that benefits us all
- Extending agility, iterative methods, and rapid releases in development and acquisition
  - Agile and SE – Dev\*Ops - integrated cross-discipline processes and management for agile programs
- Mission solutions / Mission Engineering / SoS – program portfolios
- Talent management and workforce development
  - Industry and government partnerships – leverage DAU, NDIA E&T Committee
