DoD ATS

* Service's Family of Testers (FoT)

DoD ATS Executive Directorate -- AMB

DoD ATS

- The DoD ATS ED and its joint services organizational structure shall serve as a forum to promote service collaboration, information exchange, and project and processes leveraging across all DoD services to help synergize, optimize and steer DoD enterprise ATS investment and implementation strategies to support the following DoD ATS goals:
 - Reducing ATS total ownership costs by minimizing the proliferation of unique test systems and standardizing on designated ATS families
 - Reducing ATS logistics footprint to enhance the warfighter's ability to rapidly deploy support along with weapon systems in modern conflict scenarios
 - Improving the quality of diagnostics and fault isolation to reduce the time required to test, repair and return to service failed systems and components
- AMB less focused on solely ATS policy but greater focus on leveraging technology investments and sharing information

Creating ATS interoperability/transportability within/across the Services
through MOSA → DoD solutions

DoD ATS Executive Directorate -- AMB

DoD ATS

- Last DoD AMB meeting was conducted virtually on 31 Aug 2022
 - Attended by participants including representatives from each of the DoD military services
 - Mr. Scott H. McClain, new ATS Division Chief represented the AF and AMB Chair
 - Each of the active Joint Service IPT Chairs summarized their Team's accomplishments and plans
 - The AF and Navy held a side meeting to discuss opportunities for collaboration between the services
- Next DoD ATS Management Board (AMB) meeting is scheduled for Mar 8
- The DoD ATS Executive Directorate public web site is:
