Does industry support "Sustainment" of Legacy Platforms like the M113 or does the Army handle sustainment for legacy platforms completely internally through the Depots?

From [Mitch Stevenson](#) to [Everyone](#): 01:25 PM

Pls talk to the future of MRAPs for the Army

In the PB22 submission to Congress, the Army topline decreased by \$6.2B as compared to the FY22 projections in PB21. You mentioned that Modernization and R&D are likely billpayers. Since PB22 did not include any FYDP details, Industry is unable to forecast which future markets they should invest. When do you expect to release FYDP data and do you expect to see additional major program restructures as part of POM23-27?

Comments on the assessment today by the National Academies of Sciences, Engineering and Medicine that all-electric battlefield vehicles will not be practical until at least 2035?

From [Sauer, Wayne](#) to Everyone:

Has programs such as TFDS and BFDS been stretched and lost priority in the budget pressure environment. Also is the MET trailer considered a critical program to move ERCA MPF etc.
