

Title: *Guidelines for POSTERS at 30<sup>th</sup> International Symposium on Ballistics*

POSTER SIZE: \*\* no larger than 1m x 2m (**width x height**) \*\*

**INQUIRIES TO: Clive Woodley**

**Tel: +44 01959 514996**

**E-mail: [crwoodley@QinetiQ.com](mailto:crwoodley@QinetiQ.com)**

**BANNER:** The Poster Banner **must** contain the following information:

- The title of the poster.
- The names of the authors, with the presenting author(s) indicated by an asterisk.
- A photograph of the presenting author.
- The logos of the author(s) affiliations.

**CONTENT:** In developing the content of their poster authors should be aware that the South African Ballistics Organization (SABO) has established an award for the best poster at the International Symposium on Ballistics. Authors are therefore advised to visit the Society's website [www.ballistics.org](http://www.ballistics.org) and click on Awards on the home page, followed by 'SABO Award' to see the poster of the previous recipient of the award.

The font(s) employed in the poster should be of size to be readily legible and clear to other delegates. Similarly the layout of the sections should follow a clear logical pattern.

It is recommended that the paper contain, but not be restricted to, the following sections:

**Introduction:** Sets out the research question being answered or addressed.

**Objective:** Statement on the objectives of the research being reported.

**Approach:** The experimental and/or theoretical methods employed during the research.

**Results:** A clear presentation of the results and a description of their importance.

**Conclusions:** A statement of the conclusions from the research.

**Future Efforts:** A statement, if appropriate, of any future planned studies or research required to further the objectives.

**References:** References where used should be assigned a number and placed in the list of references at the end of the poster—similar to the list that follows. Each time this source is cited in the text, it should be referred to by its original number. Each number

should be placed in brackets at the end of the referenced phrase before any final punctuation mark, e.g., as [2]. A sample of listings is provided for a journal paper [1], a book [2], a chapter in an edited book [3], an unpublished report [4], and a presentation at a conference [5]. (If square brackets are not available to you, parentheses are acceptable.).

**Acknowledgments:** Colleagues, companies, etc. who have supported the research work should be acknowledged here.

**Figures:** Figures should be clearly labeled and referenced in the text in the Poster. Axes and legends on graphs should be clear and properly identified.

**Illustrations:** Illustrations should be relevant and be treated as "Figures" and labeled as such.

**Scientific Units:** All units should adopt the SI system.
