## CLOSING COMMENTS AND CONFERENCE ADJOURNS

SALON I, J, K, L

The NDIA has a policy of strict compliance with federal and state antitrust laws. The antitrust laws prohibit competitors from engaging in actions that could result in an unreasonable restraint of trade. Consequently, NDIA members must avoid discussing certain topics when they are together at formal association membership, board, committee, and other meetings and in informal contacts with other industry members: prices, fees, rates, profit margins, or other terms or conditions of sale (including allowances, credit terms, and warranties); allocation of markets or customers or division of territories; or refusals to deal with or boycotts of suppliers, customers or other third parties, or topics that may lead participants not to deal with a particular supplier, customer or third party.

 CANDA Solutions

## CANDA SOLUTIONS

### PREMIER SPONSOR

CANDA Solutions, LLC has been building Personnel Security Case Management systems for both Federal Agencies and Government contractors for over 10 years. We've taken Business Process Management systems, major label ERP systems, and generic case management systems and customized them to fit the Personnel Security processes for our customer's usage. What we learned was that Personnel Security systems usually end up as the heart-beat of an organization and they are unique in many ways. Based on these experiences, CANDA decided to invest time and money in the development of an integration-friendly COTS system specifically built for Personnel Security Case Management. We launched this system as Fresh Haystack.

Over the last 3 years, CANDA has deployed Fresh Haystack into multiple production releases of a Security Clearance Processing Case Management System designed to navigate all clearance-centric business cases while integrating multiple internal and external core systems. Our multi-organizational users experience a seamless, role-based, easy to navigate, modular interface that guides the security clearance process through the many touch-points of a fully adjudicated security clearance lifecycle.

Fresh Haystack is a "game-changer", as some of our clients have described it post implementation. A comprehensive, logically structured, user friendly case management system, Fresh Haystack (FH) is a paperless, workflow based and automated Case Management solution built for the specific purpose of streamlining the complex security and background investigation management processes. FH was built to cut cost, increase efficiency, increase productivity, enable automation and deliver visibility into the security clearance process. FH brings clarity to candidates, security personnel, adjudicators, investigators and internal auditors. Our modular system is easy to implement, allowing for a rapid, staged deployment with follow-on releases of enhanced features to accommodate program breadth, secure integration needs and evolving requirements.

We developed Fresh Haystack to provide the Defense Industrial Base (DIB), responsible for our National Security, what is needed in the domain of Personnel Security and Human Resources out of the box, allowing us to focus on the unique challenges within each organization. Fresh Haystack allows quick, Agile delivery – our solution can be configured, installed and used in a matter of weeks.
