

A person with short dark hair and glasses is seen from the side, wearing a light blue shirt. They are sitting at a wooden desk, typing on a laptop. In front of them are two other laptops and a large monitor. The left laptop shows a data dashboard with charts and tables. The middle laptop shows a video call with a person's face. The large monitor displays lines of code in a dark-themed editor. The background is a blurred office or lab setting with brick walls and windows.

DOD SOFTWARE ACQUISITION - A NEW APPROACH

UPDATED 10.18.19

November 14, 2019 | Tampa, FL | NDIA.org/DoDSoftware

4:30 pm

WORKSHOP ADJOURNMENT

The NDIA has a policy of strict compliance with federal and state antitrust laws. The antitrust laws prohibit competitors from engaging in actions that could result in an unreasonable restraint of trade. Consequently, NDIA members must avoid discussing certain topics when they are together at formal association membership, board, committee, and other meetings and in informal contacts with other industry members: prices, fees, rates, profit margins, or other terms or conditions of sale (including allowances, credit terms, and warranties); allocation of markets or customers or division of territories; or refusals to deal with or boycotts of suppliers, customers or other third parties, or topics that may lead participants not to deal with a particular supplier, customer or third party.
