PROCUREMENT

WHO WE ARE

The Procurement Division is a key component of NDIA's Policy Team, which monitors and advances sound and practicable procurement/acquisition policies on matters that affect government/industry relationships relating to this important process. The Division ensures that government obtains requisite supplies and services at an equitable price with the least possible disruption of industrial practices. Accordingly, the Division maintains a close working relationship with government and industry agencies while conducting special studies to provide government with industry perspectives on policies, practices, needs, and problems. In addition to offering members the opportunity to sit on industry/government committees, the Division engages in the preparation and filing of amicus curiae briefs before the appeals courts and the U.S. Supreme Court.

PROCUREMENT EXECUTIVE COMMITTEE MEETING

RINGCENTRAL

NDIA has a policy of strict compliance with federal and state antitrust laws. The antitrust laws prohibit competitors from engaging in actions that could result in an unreasonable restraint of trade. Consequently, NDIA members must avoid discussing certain topics when they are together at formal association membership, board, committee, and other meetings and in informal contacts with other industry members: prices, fees, rates, profit margins, or other terms or conditions of sale (including allowances, credit terms, and warranties); allocation of markets or customers or division of territories; or refusals to deal with or boycotts of suppliers, customers or other third parties, or topics that may lead participants not to deal with a particular supplier, customer or third party.

Mr. Mitha served as the President and CEO of Imbue Group, Inc., which provided the subject matter expertise to DoD's industrial base and innovation programs on small business programs, supply chain risk, defense procurement policy, utilization of other transactional authorities, engaging small businesses within the national security technology and industrial base, and advanced manufacturing.

In his previous time at the Department of Defense, Mr. Mitha led several programs and initiatives that have increased the visibility of small business within DoD, modernized

programs to infuse small business capability into major defense acquisition programs and increased effective dialogue with industry.
