- Relevant Technology (formerly Domenix) Research International, Inc.
- TENAX Technologies
- Tex-Shield, Inc.
- The Lucas BD Group
- Tradeways USA Ltd.
- Tyco
- VF Warner & Associates
Health of Sector

• Overall, the sector has grown and there has been a positive movement to assist and help small businesses participate in JPEO opportunities.

• The Small Business office should allow small companies to express their authority (optional) to release their names in requesting a RFP.

• This would allow companies to contact them for possible teaming.

• Old story but some small companies have the technology but not the knowledge of the JPEO business sector
Major Sector Concerns

• Continuation of practice of not holding a bidders briefing after release of a draft RFP and after Q&As are released.
  – Example: the Chemical Surface Detector (CSD).

• Good build up during APBIs and announcement of programs but confidence wanes when long major delays occur
  – Examples: JCACS, CSD, JE-RDAP.

• Contract vehicles are still an issue for SB with credentials to get work.
  – Can the JPEO look at the GSA IT 70 schedule as an option for small and easy contact awards?
  – Many SB have schedule and can easily get them. the JPM can target SBs with capabilities for small dollar awards (~100K) for efforts that do not require large procurements.
Sector Expectations for CBDAIF Meeting Outcomes

• Honest and open communications – this has improved over the years and we know Doug will make it even better.
  – More forecasted budgets
  – Earlier announcements of probable delays in RFPs.

• Perhaps CBDAIF can recommend – and JPEO can consider – holding a working conference on how actual opportunities with ECBC/JPEO work or how companies can collaborate with ECBC/DTRA.
  – Need to address openly how the money flows.
