

National Defense Industrial Association

The Automatic Test Committee of the National Defense Industrial Association's Systems Engineering Division
presents the

John Slattery Professional Achievement Award posthumously to

Harry J. McGuckin, Jr.

for his distinguished contributions to the Automatic Test Equipment (ATE) Industry.

The award honors the memory of John Slattery, an engineer with the General Dynamics Electronics Division and Former Chairman of the MATE Users Group Control and Support Software Committee, is presented annually to recognize the individual who best characterizes John Slattery's contributions to our industry, including:

- Outstanding Technical Achievements.
- Demonstrated Technical Innovation.
- Contributions to Automatic Test Equipment Technology.
- Participation in Automatic Test Equipment Industry Peer Groups.
- Enthusiasm and Eagerness to Offer and Provide Mentoring.
- Uncompromised Ethics and Professionalism.
- Industry contributions that reflect technical zeal, competence, and integrity.
- An unswerving desire to achieve technical excellence regardless of political or management considerations.

Given this 14th day of September 2016 at the Disneyland Conference Center, Anaheim, California

Leslie A Orlidge

Chair, NDIA Systems Engineering Division, Automatic Test Committee
