

# Automatic Test Committee – 2015 Status

2015 Tasks Planned	Status	Accomplishments (deliverables, etc.) - Comments
Semi-annual Government/Industry Liaison Reports	Complete	<b>Status:</b> <ul style="list-style-type: none"> <li>• April and November Meeting Liaison Reports complete</li> <li>• April reports are posted on ATC website. November reports to be posted NLT 18 December</li> </ul>
Complete Software Architecture for Synthetic Instrumentation project	Ongoing	<b>Status:</b> <ul style="list-style-type: none"> <li>• Project goals were re-evaluated at Fall ATC meeting. Project scope and goals were redefined</li> </ul>
Re-evaluate need and project goals for an Industry Survey for Smart Automatic Test System Opportunities	Deferred	<b>Status</b> <ul style="list-style-type: none"> <li>• Project deemed not needed at this time. Recommend re-evaluating need at Fall 2016 meeting.</li> </ul>

## Proposed 2016 Tasks:

- **Government/Industry Liaison Reports**
- **ATC projects:**
  - **Complete re-defined Software Architecture for Synthetic Instrumentation project**

## Schedule / Resources

Status/Review/Present at regular ATC meetings:

- March/April at NDIA HQ
- September adjacent AUTOTESTCON in Anaheim, CA
- December with SED (TBD)

No resource issues or support anticipated

## Deliverables / Products:

- **Semi-annual Reports posted on ATC Web-site:**
  - US Army ATS Liaison Report
  - USAF ATS Liaison Report
  - US Navy/USMC-Air ATS Liaison Report
  - USMC-Ground ATS Liaison Report
  - DoD AMB Liaison Report
  - Commercial ATS Liaison Report
- **Survey industry and report on the pros/cons and feasibility of such standardization. Include the potential to expand beyond synthetic instruments to other (non-synthetic) instruments.**

## Issues / Concerns:

Limited Budget/resources:

- **ATC is focusing on high value projects, deferring lower priority projects.**
